EDUCATION

COMPUTER SCIENCE AND WEB DEVELOPMENT

LAMBDA SCHOOL

09/2018 – Present

- Lambda School is a 18+ months Computer Science & Software Engineering Academy that provides an immersive hands-on curriculum with a focus on computer science, software engineering, and web development.
- Approached all coding challenges using pair programming.
- Wrote production-ready code using ReactJS, Redux, and CSS on the frontend and NodeJS and Express on the backend to build single page applications.
- Utilized agile software development and Git workflow on all projects.
- Gained hands-on experience with client and server testing.
- Completed all curriculum course work including: React, Redux, Node, Express, Jest, Python, C, etc.

Masters in Computer Science

UNIVERSITY OF HOUSTON

1998 – 2001

- Masters Thesis - "An Object Oriented Subsystem for Learning Directions and their Relationships" - Developed an object-oriented subsystem, part of a large learning program, using C++ in a team of two.
- Teaching Assistant - Supervised the assembly, and C programming course lab. Graded programming assignments and tests. Provided help and assistance to students as needed.

WORK EXPERIENCE

Systems Analyst

ANADARKO PETROLEUM

2002 – 2004

- Point of contact for customizing Documentum (Document Management Software) to fit users needs - Java - HTML.
- Managed Employee Training (documentation and training manual) and Administration (provide accounts, fix problems, help users with daily tasks) of StarTeam (team collaboration software).

SKILLS

JavaScript

React

Redux

React Hooks

CSS

HTML

Node.js

Express

RESTful APIs

graphql

Testing - Jest

Python

PERSONAL PROJECTS

Hello Melon (05/2019 – 07/2019)

- Hello Melon is a simple, user friendly nutrition tracking application that provides a visualization of eating patterns and nutritional data to empower people to take control of their health.
- This application was built by a remote team of 6 (then 4) people managed and guided by Lambda School's Team Leads. It took about 10 weeks to build (working mostly nights).
- Tech: React - GraphQL - sqlite3 - Stripe - MaterialUI - Styled Components.
- Application: <https://hello-melon-lambda.netlify.com/>
- Code: <https://github.com/labspt3-nutrition-tracker>

Forget Me Not (09/2019)

- Forget Me Not is an application that sends thoughtful messages, on your behalf, to people you know on their special day.
- This application was built initially during a build week by a remote team of 5, it was called BETTER FRIENDS REMINDERS. I was responsible for the back end portion. I was also taking the role of the team lead. It took about 2 weeks to build (working mostly nights). I added some technology (Redux for example), and refactored the code to create Forget Me Not.
- Stack: React - React Hooks - Redux - Node - SQLite - Sendgrid - MaterialUI - Styled Components
- Link: <https://forgetmenot.netlify.com/>
